Summary

A sleeve to relieve the strain on the Usb connection of my Pinecil. And to prevent further cracks in the casing.

Tags: [iron](#) [soldering](#) [pinecil](#)

I made this sleeve because I noticed a crack in my pinecil casing and thought I'd incorporate a simple strain relief for the usb connection.

It is designed for the baseus cable that I mainly use, but it fits other cables (not all) I own as well.

I printed the sleeve in TPU. Make sure it is a tight fit.
